The following is an examiner's statement of reasons for allowance:

The primary reason for allowance is the inclusion of having a writing circuit configured to pass a current through a first wiring in order to record an information in a magnetic recording layer by a magnetic field generated by the current in a magnetic memory comprising a magnetoresistance effect element having a magnetic recording layer, a first wiring extending in a first direction on or below the magnetoresistance effect element, and a covering layer ^{with} ~~with~~ a specific condition disclosed in claims 1, 9 and 16.

Claims 2-8, 10-15 and 17-20 are allowable because of their dependency of the allowed claims.
